

XX International SIIV Summer School

ADVANCES IN PAVEMENT AND HIGHWAY ENGINEERING

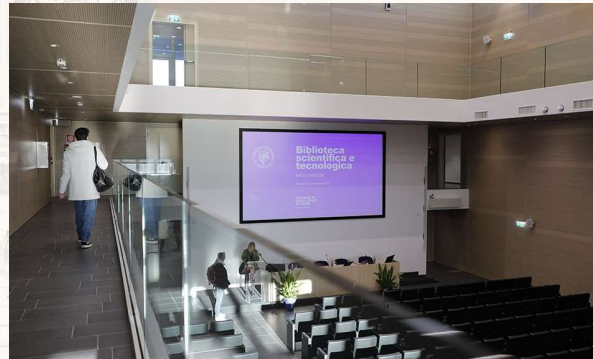

Università degli Studi di Udine
September 9th – 13th 2024

Introduction

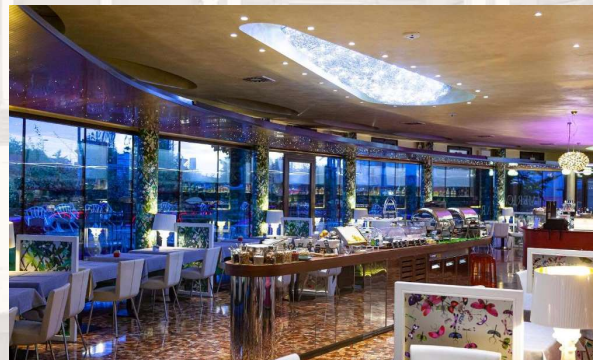

SIIV – Società Italiana Infrastrutture Viarie and the Polytechnic Department of Engineering and Architecture (DPIA) – University of Udine are proud to announce they are jointly organizing the XX International SIIV Summer School, that will be held in Udine on September 9th – 13th, 2024. The XX International SIIV Summer School edition is aimed at discussing the most innovative topics within the general framework of pavement and highway engineering. Cutting-edge technologies for pavement materials will be presented and deeply discussed, also with respect to road construction sustainability and resilience against extreme events related to climate change. Through lectures, workshops, and technical visits provided by both industry and academic experts, attendees will be able to gain practical insights into relevant topics including, but not limited to, bio-binders, high-performance super-modified bitumen, advanced chemo-mechanical materials characterization, pavement durability, as well as smart roads and car driving simulations. SIIV ARENA will also take place, providing an attractive opportunity for doctoral students in the field of road infrastructures to share the research projects they are currently working on.

Venue

SIIV lectures will be held at the Lecture Hall of the DPIA (Via Fausto Schiavi, 44, 33100 Udine UD).

Institutional greetings and the SIIV ARENA will be held at the Là di Moret Hotel (Via Tricesimo, 276, 33100 Udine UD) where attendants will be accommodated as well.
