**UNIVERSITÀ
DEGLI STUDI
DI UDINE**

hic sunt futura

Seminario organizzato nell'ambito del Corso di Laurea in Viticoltura ed Enologia

Microbes, climate, agriculture and society

Prof. Heribert Insam

15 Ottobre 2025 – h 10:30

Aula Delta 3 – Sede “Feruglio”, via delle Scienze 206, 33100 Udine

Heribert Insam

Prof. Em., University of
Innsbruck; Co-founder
Biotreat GmbH

Prof. Dr. Heribert Insam is a former Full Professor of Microbiology, he was Head of the Institute of Microbiology at the University of Innsbruck. Since 30 years, climate-driven carbon dynamics in soil continues to be one of his major research interests.

His researches covers a multitude of subject areas in environmental microbiology; microbiology of composting and anaerobic digestion, soil remediation, biofilm ecology and wastewater treatment are only a few to mention.

He is author of more than 200 scientific papers, editor of four books and was serving as Editor-in-Chief for Applied Soil Ecology. He co-founded the company BioTreaT (Biological Treatment Technologies) GmbH, Innsbruck, that addresses issues related to biological wastewater and waste treatment. He is a very active public science communicator (MikroMondo, Sound of Science).
